

fondation en cœur

Béatrice's Story

Béatrice was born with a congenital heart defect called tetralogy of Fallot. She underwent a first surgery at the age of 6 months and a second in 2012. Although she's now well, she's followed regularly for her tetralogy of Fallot. On many occasions, the En Cœur Foundation was present for her parents, which is why today she wants to get involved as an En Cœur ambassador.
