

fondation en cœur

Léa's Story

Passionate primary school teacher, loving and devoted mother, Léa is the mother of Anna, who was born with a major ASD and a VSD. The diagnosis fell at 12 days of life. She was operated on at 3 and a half months at the CHUL. Anna was followed by Dr. Jean-Marc Côté and the entire team of cardiologists. The support of the En Cœur Foundation was essential. The Foundation was a pillar throughout these difficult times which occurred amid a global pandemic. The moral support of the team of volunteers was more than appreciated by Léa, who, due to health measures, had to spend most of her time alone during these 11 days of hospitalization.
